PROFESSIONAL SUMMARY

Detail-oriented Security Analyst and Automation Specialist with a strong foundation in threat response, access governance, and workflow optimization. Expert at leveraging Python and AI-driven orchestration to automate incident response and alert triage pipelines, reducing manual verification efforts by up to 75%. Combines deep technical training in vulnerability management with over a decade of operational leadership to coordinate multi-stakeholder workflows and maintain rigorous security hygiene.

EXPERIENCE

Agentic Systems Engineer | AI Workflow Architect

RiseUp with ServiceNow Innovation Hub (Kura Labs) | June 2025 – Nov 2025

- **Architected and deployed** robust, automated alert triage and threat response solutions using n8n and ServiceNow to streamline operations and reduce process latency by 40%.
- **Implemented sequential AI agents** and human-in-the-loop verification workflows to perform continuous validation of incoming alerts, ensuring data integrity and mitigating operational risk.
- **Engineered custom integrations** via APIs to trigger automated infrastructure remediation, demonstrating strong capability in managing SaaS and cloud platform security settings.
- **Translated complex technical requirements** into actionable workflow documentation, coordinating directly across stakeholder teams to drive the seamless adoption of new automated processes.

Processing Operations Manager

Free Library of Philadelphia | Dec 2014 – March 2025

- **Managed high-volume operational workflows** exceeding 20,000+ items annually, utilizing data tracking to identify process bottlenecks and implement continuous improvement strategies.
- **Led and supervised** a team of 10 personnel in adopting new software tools and technical compliance standards, fostering strong cross-functional communication and reliable follow-through.
- **Overhauled vendor integration pipelines** and administrative controls, ensuring secure supply chain management and precise tracking of organizational assets.

PROJECTS

End-to-End Security AI Triage Sandbox & Python Automation Tool

- **Created a Python-based command-line security tool** to automate vulnerability scanning and log analysis, reducing manual verification effort by 75% through standardized parsing pipelines.
- **Built an orchestrated incident processing pipeline** utilizing n8n to ingest multi-source alerts, automatically triage credible threats, and reduce manual intervention by 65%.
- **Developed an automated infrastructure remediation system** leveraging APIs and conversational AI to detect, flag, and

isolate compromised instances, improving threat response time by 50%.

EDUCATION

B.S. Cybersecurity and Information Assurance

Western Governors University (August 2026)

SKILLS

Phishing Triage, Incident Response, Access Governance, Identity & Access Management (IAM), Bug Bounty Workflow Coordination, SaaS Administration, Vulnerability Management, Log Analysis, Python, JavaScript, SQL, ServiceNow AI Agent Studio, Flow Designer, n8n Orchestration, Linux/Unix Administration, AWS APIs, Written & Verbal Communication.

CERTIFICATIONS

- ServiceNow Certified System Administrator (CSA)
- Systems Security Certified Practitioner (SSCP)
- CompTIA Network+
- CompTIA A+
- CompTIA CySA+
- ITIL v4 Foundation
